

Description

Utilising our knowledge of light sources, optical parts, LED technology and metal working, we can put together custom bespoke solutions to suit your needs. Email us at info@silent.design to talk to us about your requirements

Our most common solutions are:

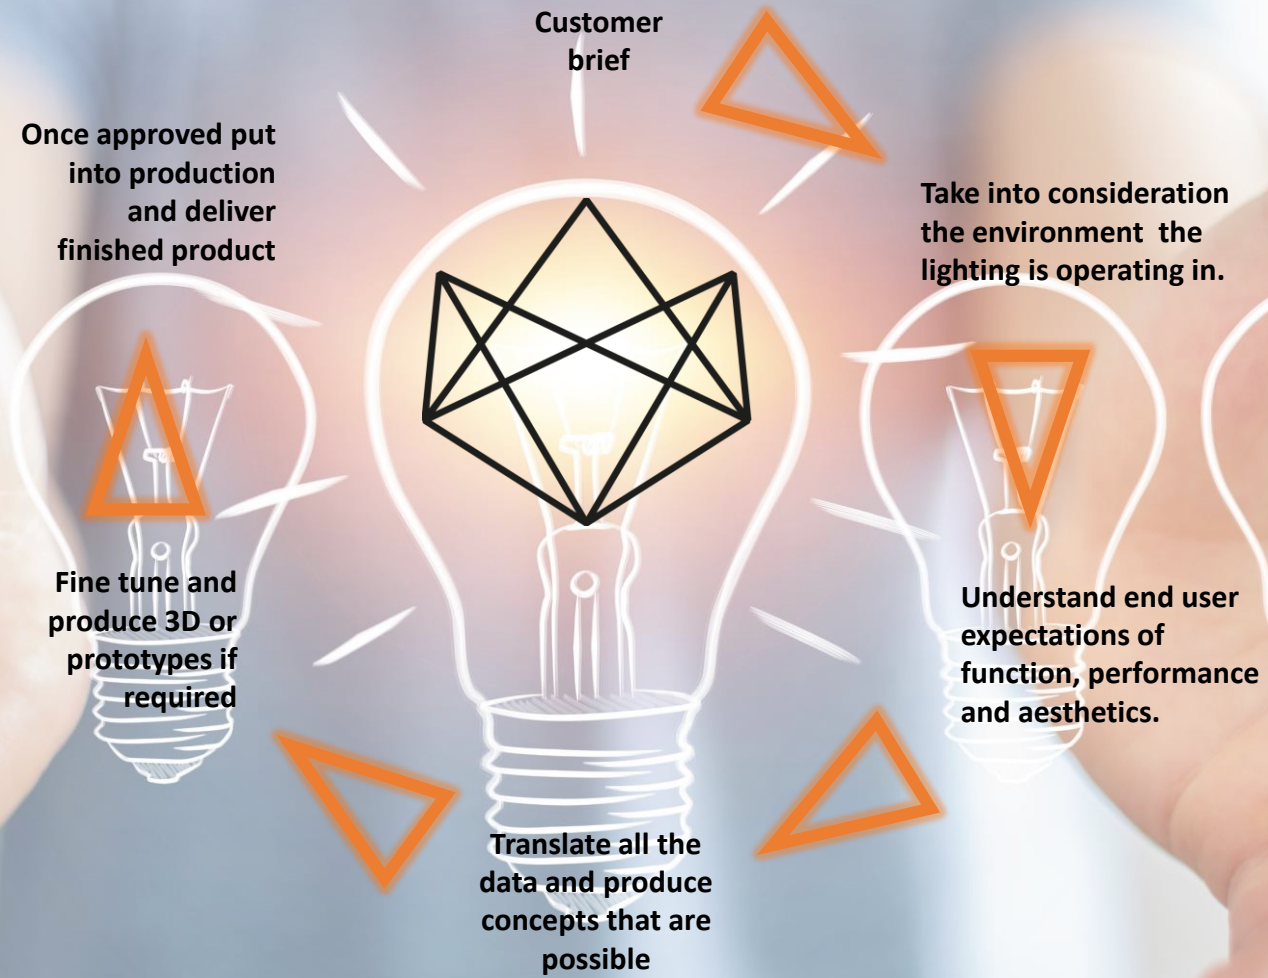

- Custom ceiling type integration
- Recessed trimless linear runs with spots and general lighting
- One off bespoke items to suit
- Small run lighting to replace existing units

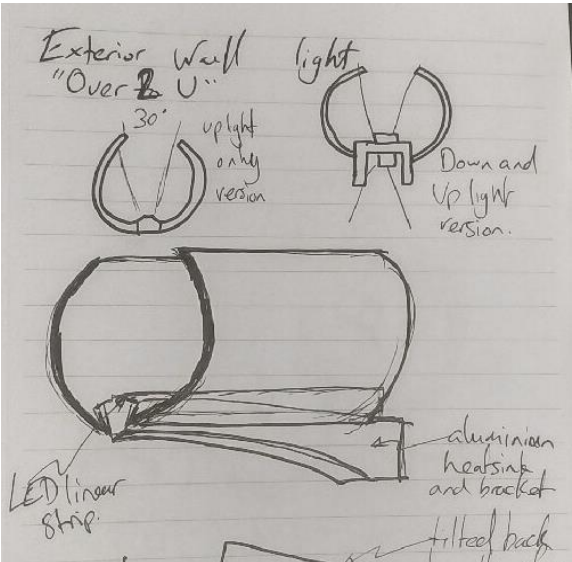

Our process

Listening to our customers requirements and producing a solution that makes them smile is our goal every time.

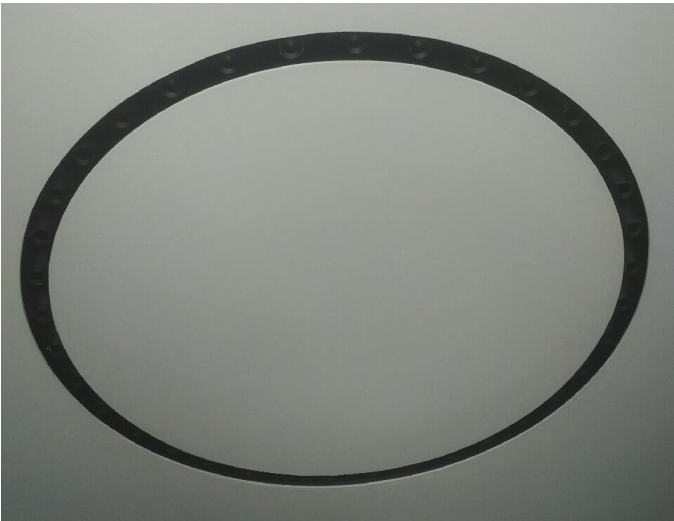

Custom linear profiles

Design service

PIR infill panels to suit different manufacturers

Bespoke fittings

Made to fit lighting
